

Investment message

Heads of the Kirsanovsky district of the Tambov region for 2023

Dear colleagues, partners and residents of the district!

Dear representatives of the entrepreneurial community and investors!

The treatment of a message to the entrepreneurial community, state authorities, local governments and residents of the Kirsanovsky district has become a tradition for us. The purpose of this Epistle to convey to potential investors the advantages of doing business and investing in the territory of our region, to determine the tasks facing us and outline specific steps to stimulate investment activity in the area.

Sustainable economic growth and comfortable living conditions are the main strategic priorities of the administration of the Kirsanovsky district.

The business plays in solving the strategic tasks of the district the main role: new jobs are created, the salaries and income of our population is increased.

In the region, a large enterprise LLC Yuvag operates. In the district, the number of small and medium -sized enterprises is 332 units, of which 42 legal entities and 290 individual entrepreneurs, the number of self -employed is 458.

Increasing the investment attractiveness of the Kirsanovsky district and the formation of a favorable investment climate are the main tasks for local governments.

The volume of investments in fixed assets amounted to 1435.8 million rubles for 2022, of which 1384.2 million rubles due to extrabudgetary sources. New investments contribute to the improvement of the socio-economic development of the region, solve the problems of employment and help increase the revenues of the district budget. Agriculture is being revived by attracting financial resources from the federal and regional budgets, and at the expense of private investors.

The creation of a favorable investment climate and attracting investment in the economy are the most important tasks set to local authorities. An increase in the volume of tax revenues to the budget, creating new jobs, increasing the level and quality of life of the population depends on their successful implementation.

The Kirsanovsky district has significant opportunities for the influx of investments, such as:

- • low level of competition, especially in the field of industrial production, processing of agricultural products, hunting and fishing tourism;
- • rich potential for the use of environmentally friendly environment;
- • availability of free labor resources;
- • The presence of free land for investors
- • Stable tax system
- • Developed transport network, network of communication and power supply communications.

Much has already been done in order to develop investment activities in the Kirsanovsky district.

An important task of 2023 is the adoption of measures to reduce administrative barriers to business and the formation of an objective idea of the investment attractiveness of our municipality.

The results of the work in this direction: the work on the implementation of the municipal investment standard was completed, aimed at developing small and medium - sized enterprises and the removal of administrative barriers; Every year, the region is

working on the development of an assessment of the regulatory effects of municipal regulatory acts affecting the implementation of entrepreneurial and investment activities.

The official website of the administration operates the “Municipal Standard” section, which provides information on the investment policy of the district, the forms of support for investors and entrepreneurs, the timing of administrative procedures upon receipt of permits for construction, putting the facility into operation, information about investment projects, implemented and implemented and implemented planned for sale in the Kirsanovsky district.

An “investment passport” of the district is updated annually, which is posted on the official website of the administration of the Kirsanovsky district of the Tambov region. This document allows entrepreneurs and investors to get information about the investment potential of the district, learn more about its geographical position, natural, land and labor resources, and get other useful information about the area.

Currently, work is being actively carried out on the formation of infrastructure for the implementation of investment projects.

On a permanent basis, a register of investment projects planned for implementation in the territory of the municipality is formed.

The list of municipal property of the municipality of the Kirsovsky district and eight village councils of the district, free from the rights of third parties intended for granting it to own and for use of small and medium -sized enterprises and organizations forming the infrastructure of supporting small and medium -sized enterprises, which provides for 35 objects, is approved. To provide for use on appropriate conditions, which is constantly being updated and 11 objects in the lists of village councils of the district.

Work was carried out to improve the investment climate in the communal sphere:

- work was carried out to assess the technical condition of public roads of local importance in the territory of the municipality Kirsovsky district;
- The inventory of public and courtyards was carried out, a public discussion of the improvement of territories determining the future appearance of settlements.

Changes were made to general plans and rules for land use and development of municipalities of the district in order to ensure the possibility of building socially significant facilities. Additionally, work is underway to introduce the boundaries of settlements and territorial zones to the USRN base. And this work continues.

Much has been done in matters of interaction with investors and entrepreneurs, increasing the availability of municipal services in electronic form and reducing the terms of permits.

So, the area provides for the provision of full assistance to private partners in the implementation of investment projects in the municipal district as part of the municipal-private partnership (municipal concessions).

The average term for consideration of applications for the issuance of building permits is 3 business days (according to the law - 5 working days), the average period for issuing urban planning plans for land plots was 12 working days (according to the law - 14 working days).

The deadlines for consideration of applications and appeals of investors that implement and (or) planning to implement investment projects are reduced: investment projects:

- decision -making on the establishment of conformity of the permitted use of the land plot to the classifier of the permitted use of land on the basis of a statement by the copyright holder of the land plot up to 15 calendar days;

- issuance of permission for the use of land or land plots located in state or municipal property without providing land and establishing easement up to 20 calendar days;
- conclusion of an agreement on the establishment of a easement in relation to a land plot up to 20 calendar days;
- preliminary approval of the provision of a land plot is up to 25 calendar days;
- decision -making on approval of the location of the land or land on the cadastral plan of the territory up to 7 calendar days;
- providing a land plot without trading up to 20 calendar days.

The task of improving the comfort and quality of business service will be relevant for the coming period.

The municipal district provides for the provision of property, information, consulting support to small and medium -sized enterprises.

The key measures in the current 2023, in order to attract investments and improve business conditions, should be:

- 1) in the field of housing and communal services:
 - the conclusion of the concession agreement between the municipalities of the district in relation to the sanitation and water supply system;
 - timely and high -quality work on the arrangement of public and courtyards.
- 2) in the field of construction:
 - fulfillment of target indicators for housing input;
- 3) in the field of land use:
 - Preparation of sites for the implementation of significant investment projects by organizing cadastral work in order to clarify the location of the boundaries of land plots, as well as free lands (land plots) for subsequent provision to potential investors.
- 4) in the field of municipal property:
 - the expansion of the list of municipal property of the municipality of the Kirsovsky district, free from the rights of third parties (with the exception of the right to economic management, the rights of operational management, as well as property rights of small and medium -sized enterprises) to support small and medium -sized enterprises.
- 5) in the field of electronic document management:
 - an increase in the share of the provided municipal services in electronic form through the official Internet portal "State Services" and the MFC.

The district concluded an agreement on cooperation with the corporation of the development of the Tambov region in the field of investment attracting. As part of the implementation of the municipal standard, a number of documents have been developed that will contribute to the conduct of entrepreneurial and investment activities in the area:

- the investment authorized and authorized body responsible for attracting investments and interaction with investors is determined;
- a coordination council of the district for investment policy is being created;
- the investment declaration is approved;
- a bilingual section in the investment passport of the district is created;
- the regulation of support for investment projects on the principle of “one window” is approved;
- The plan for the creation of investment facilities and infrastructure facilities in the district, etc.

A lot of work is carried out in the Kirsanovsky district to attract investment and improve the life of the region’s population.

As part of the implementation of national projects in the Kirsanovsky district, a lot has already been done and much to do.

As part of the national project "Housing and the City Environment" of the regional project "Clean Water".

In 2022, work was completed:

-Sting the water purification station in the village. Molokanshchina of the Kalais village council and the construction of a water intake well in the village. Shinovka of the Kalais village council.

In 2023, work is already being carried out:

-construction of a water intake well with a water tower in the village. Golynshchina of the Golynsky village council and the construction of a water intake well in the village. North Kovyl village council.

As participation in this National Pretext will improve people's lives, I think you understand. Pure water is the time of our lives!

Regional project "Formation of a comfortable urban environment"

In the district, 23 public and 11 courtyards have already been landscaped in the district, work was carried out on the improvement of cemeteries, the construction of street lighting, courtyards, and ennobled public spaces.

In 2022, 11 projects on 3 village councils were implemented, where 5 courtyards and 6 public territories were landscaped.

In 2023, it is planned to implement measures in 23 territories, including Of these, 18 -public and 5 -two.

Regional project "Housing"

State program of the Tambov region "Providing affordable and comfortable housing and communal services of citizens of the region"

As part of the subprogram "Youth - Affordable Housing" in 2019-2021, 68 families received certificates for the purchase or construction of housing.

In 2022-5 families received certificates for the purchase of housing, of which 4 families are large.

Cases for payments to 5 young families are presented in 2023.

In accordance with the priorities of state policy in the field of housing and communal services, as well as with the goals and objectives determined by national projects, the State Program for the capital repair of common property in apartment buildings is valid.

During the program, a major overhaul of 16 apartment buildings in the Uvarovshchinsky, Kovyl and Sokolovsky village councils was carried out.

In 2022, major repairs were carried out in the village. Field of the Sokolovsky Village Council and in the village. Ovsynovskaya road of the Uvarovshchinsky village council.

In 2023, applications for major repairs of 7 apartment buildings located in the Kirsanovsky district were submitted.

National project "Safe and high -quality roads"

State program of the Tambov region "Development of the transport system and road economy of the Tambov region"

The length of public municipal roads in Kirsanovsky

The area is 513.6 km, including district-261.6 km. To maintain roads in a state that meets regulatory requirements, their repair is carried out annually.

Conducted:

-Montornaya roads with a coating from crushed stone coating for a total length -6.8 km.

-Reproduct of the field "Field-Podzdvigalovka-Berezovka", with a length of 5.87 km

-Mont of the section of the Polevo-Podvigalovka-Berezovka highway -spers to the village. Field, length 0.85 km

In 2022, the 1st stage was completed:

-Repair the Kirsanov-Golynshchina-Kargalovka highway -1.4 km

-repair of the Kirsanov -Tonovka road section -0.55 km

In 2023, the 2nd stage of repair of public highways was completed:

-"Kirsanov-Golynshchina-Kargalovka", with a length of 1.4 km;

-the writ of road "Kirsanov - Tonovka - per. Tonovsky" - with B. Uvarovshchina - with M. Uvarovschina ", with a length of 0.55 km.

Partial repair of the road is planned in S.M. Uvarovschina, Uvarovshchinsky Village Council and repair of the street road along 3 District Street. Shinovka of the Kalais village council.

According to the results of the national project, street-roads of rural agglomerations and roads connecting village councils are equipped. Of course, thanks to this, the number of especially dangerous traffic accidents is reduced on the tracks and human lives are preserved.

National Project "Education"

Regional project "Modern School"

In addition to 3 created centers of education of digital and humanitarian directions "Growth Point" on the basis of MBOU "Uvarovshchinskaya secondary school": in the village. B. Uvarovschina, in with. Sokolovo, in the village. Krasnoslobodsky, in 2022, 2 more centers of education of natural-scientific and technological directions "Growth Point" in the branches of MBOU "Uvarovshchinskaya Secondary School" in the village of Kalais and S. Chutanovka were opened.

2 million rubles were spent from the municipal budget for repair work and 1 million rubles from the regional budget for the purchase of furniture, branding. The equipment is received at the expense of the federal budget. Currently, laptops, educational designers and sets, digital microscopes for a total of 836.5 thousand rubles have been received.

The application for the organization in 2023 another 2 centers "Growth Point" in the branches of MBOU "Uvarovshchinskaya secondary school" in the village was satisfied. Monokovka 1st and in the village of Leninskoye.

The centers "Growth Point" is a produced new educational space, decorated in the same style and equipped with modern equipment. It is used in three areas: "technology", "computer science", "basics of life safety". During the short period of work of education centers, "Growth Point" can be said with confidence that the life of students has changed significantly. They have the opportunity to comprehend the basics of sciences and master new technologies using modern digital equipment.

Currently, design estimates have been prepared and positive conclusions of the state examination have been obtained to participate in the implementation of the project "Modernization of school education systems".

Applications for major repairs were submitted 4 branches of MBOU "Uvarovshchinskaya secondary school" in 2024:

- building No. 1 in with B. Uvarovschina;
- branch in the village of Inokovka 1st;

In December 2022, a school bus was received to organize the delivery of children. Thus, the possibilities of obtaining an affordable general education are expanding.

Regional project "Teacher of the Future"

According to the Zemsky Teacher project, a compensation payment of 1 million rubles was made to an English teacher who moved to the village of Monokovo 1st MBOU "Uvarovshchina Secondary School".

The share of teachers of educational organizations who have undergone advanced training, including in centers of continuous increase in professional skill, is 20% this year.

Taking into account the requirements of state policy in the field of education, the municipality addressedly works with young specialists:

- the number of young specialists this year is 16%;
- certification of teachers -49%;
- 2 students-heralds receive a monthly scholarship in the amount of 1 thousand rubles from the municipal budget;
- 2 young specialists have been hired;
- 27 young teachers received cash grants in the amount of 120 thousand rubles.

In the current academic year, 10 teachers of the district participated in regional professional competitions, became winners and winners.

In 2023, a large -scale participation of teachers in continuing education courses for the introduction of updated federal educational standards and the implementation of functional literacy is planned.

Regional project "Digital Educational Environment"

The share of students, for whom equal conditions for obtaining a quality education have been created, regardless of their location by providing access to the federal information and service platform of the digital educational environment-100%(10% according to the plan).

The share of teachers using services is 100% (10% according to the plan).

The proportion of educational organizations using services in the implementation of basic general education programs is 100% (according to a plan of at least 10%).

At the beginning of 2023, in educational organizations of the district, the updating of information filling and the functional capabilities of open and publicly available information resources was completed.

The supply of computer equipment was delivered to MBOU "Uvarovshchinskaya secondary school" and to branches: S. Inokovka 1st, village of Kalais, p. Sokolovo.

In 2022, the branch of MBOU "Uvarovshchinskaya secondary school" in the village. Krasnoslobodsky received computer equipment totaling 1.8 million rubles.

In 2023, the branches of MBOU "Uvarovshchinskaya secondary school" in the village of Chutanovka and in the village of Leninskoye were included in the list of general educational organizations to update the material and technical base for the introduction of a digital educational environment.

From 01.01.2023, federal state information is introduced

The system "My school". This is a single federal portal with access to educational content and services, which is implemented as part of the introduction of a digital educational environment. The area is ready to implement the program.

Is it necessary to talk about what opportunities a project gives to obtain new knowledge and skills to our children?

Regional project "Support for families with children"

2019-2022: more than 1,200 services of psychological, pedagogical, methodological and advisory assistance to parents (more established targets) were provided. In 2023, services are planned to provide more than 200.

Regional project "Success of each child"

At the beginning of the current academic year, the coverage of children with additional education in schools is 95%, in the district -86.4%.

The number of gifted children of the area included in the municipal and regional data banks is 143 people.

The scientific society "Eureka" three times became "the best scientific society of students of the Tambov region." Traditionally, school research conferences are held with the involvement of children of preschool and secondary professional organizations.

3 students became the owners of Grant Governor of the Tambov region "For Victory in All -Russian competitions."

Students of the MBOU Uvarovshchina Secondary School are steadily participating in the implementation of the project "Ticket for the Future", in open online lessons "Projectoriya", aimed at early career guidance, in the regional system of professional trials.

By order of the Department of Education and Science of the Tambov Region dated 02.16.2022. No. 334 MBOU "Uvarovshchinskaya Secondary School" was approved by the school-laboratory of innovative development in 2022-2025 in directions:

- development and testing of a model of a comprehensive transition to the updated Federal State Educational Standard of Basic General Education;

- the formation of models of "pedagogical classes" in the framework of continuous pedagogical education.

In 2023, it is planned to take part in the competition of grant support for pedagogical groups of the best educational organizations "PRO. recognition".

According to the results of the regional rating, the region's formation system takes a leading position!

National Project "Culture".

Within the framework of the national project, 2 rural clubs in s. Naked and in with. Chutanovka, seats, clothing for the stage, sound and lighting equipment were purchased.

In 2022, the overhaul of the SDK was completed with. Kalais.

In 2024, the construction of SDK in the village is planned. Sokolovo; Applications for major repairs of the SDK village were submitted. Compressor, SDK in with. Monoks 1st, capital

Repair SDK in the village. Tonk.

At the expense of the state program "Development of Culture and Tourism", the subprogram "Art" to the budget of the Kirsovsky district provided a subsidy to ensure the development and strengthening of the material and technical base of the branches of the SDK s. Chutanovka, s. Golynshchina, S. Kalais, where it was purchased: 224 theater chairs worth more than 609 thousand rubles, sound and lighting equipment worth more than 250 thousand rubles, furniture worth more than 498 thousand rubles, scene clothing worth more than 247 thousand rubles.

At the expense of the local budget for 4 branches of the village of Vyachka, S. Golynshchina, S. Chutanovka, S. Kalais, office furniture was purchased, the clothes of the stage, blinds, stands, signs, and signs were purchased.

Measures to strengthen the material and technical base make it possible to organize leisure for local residents at a qualitatively new level.

The main event of the regional project "Creative people" is to improve the qualifications of managerial workers and industry specialists based on continuous education centers and advanced training of creative and managerial personnel in the field of culture

Within the framework of the project, 12 employees of the department of culture and cultural institutions of the district were trained.

As part of the regional project "Creation of conditions for the realization of the creative potential of the nation, employees of cultural and leisure institutions and libraries participate in the competition for the title " Best Institution "and" Best Worker of Rural Culture Institutions ", in 2022 the title of the best employee of the cultural and leisure institution was awarded the head of the rural House of Culture C.1 Monokovo Ostrovskaya Irina Stanislavovna with the payment of a subsidy in the amount of 51 thousand rubles.

As part of the implementation of the regional project "Providing a qualitatively new level of development of cultural infrastructure (" cultural environment ")", the Department of Culture and Archival affairs of the region concluded an agreement to finish the goals, indicators and results of the regional project, according to the Komoroma, the target indicator of the attendance of cultural institutions before 2024 should be 377.8 thousand units. For 2022, the target indicator is 296.9 thousand visits, which is 100 % completed.

The results of the implementation of the national project are beautiful updated buildings and decorated visual halls and places for circles and sections and library! The events that RDK employees are also transformed. They have become more modern, brighter, more colorful!

National Project "Demography"

Within the framework of the national project, a specialized sports ground of the TRP was equipped in the village. Bage of the Uvarovshchinsky village council, which significantly increased the number of participation of citizens in sports.

Reached indicators:

- the availability of preschool education for children aged 1.5 to 3 years - 52.3%.
- the share of residents from 3 to 79 years old involved in physical culture and sports amounted to 57% of the total population of the district (according to the plan -53%);
- the indicator of registered citizens in the TRP system has 2964 citizens,
- 230 people have signs of the difference in the TRP.

In 2023 it is planned:

- to carry out on a regular basis the TRP festivals;
- Mature to participate in the project "Football at school".

Kirsanovsky District is involved in the regional project "Promoting Employment" of the National Project "Demography" for several years.

In 2022, 10 residents of the district were retraining.

Kirsanovites studied new professions at several universities in the country - Tomsk State University, Tambov State University named after G.R. Derzhavin, Rannias under the President of the Russian Federation. Several programs became the most popular: a nurse, content manager of social networks, business from scratch to launching a store, software tester and others.

Moms on maternity leave, pensioners and citizens of pre -retirement age, unemployed, young specialists and other categories are trained.

Passing vocational training and obtaining additional vocational education is an effective tool for promoting citizens' employment. Is this not the result?

National Project "Support for Entrepreneurship and Entrepreneurial Initiative."

Regional project "Creating a system for supporting farmers and the development of rural cooperation."

28 constituent entities of the district previously received state support, including: 6 KFH -in the program -"Beginner Farmer" in the amount of 15 million rubles. It was built and put into operation in a mechanized family farm of a dairy direction for 50 cows based on the KFH Gridneva G.B. in with. Surki.

As part of the Agrostartap project, 7 farms received grant support for the development of meat cattle breeding, dairy farming, potato breeding, berry breeding, fruiting, including 2 of them -2022. Good results are shown by the KFH of Sevostyanov Milk direction in the village. Sokolovo, KFH Levina in with. Lenin's berry direction.

The plans of 2023- participation in areas: dairy livestock, meat cattle breeding, sheep breeding.

As part of the implementation of the national goals of the district, he takes part in the state program for the development of agriculture and regulation of agricultural products, raw materials and food.

Documentation is drawn up for state support in various areas of activity in the field of agriculture and food.

In 2022, state support was received by agricultural producers of the district of almost 108 million rubles.

In 2023, the work continued

In order to ensure the national security of the Russian Federation, contained in the National Security Strategy of the Russian Federation, as well as in accordance with the national development goals of the Russian Federation, provided for by the decrees of the President of the Russian Federation in the district, the state program of the Tambov region of the integrated development of rural territories is successfully implemented.

Within the framework of the state program "Complex Development of rural territories" of the departmental project "Modern appearance of rural territories" on the territory of the Kalais village council of the Kirsovsky district of the Tambov region, the Kirsanovsky district of the first in the region entered the project "Complex development of the village of Vyachka Kirsovsky district of the Tambov region", for which he received a bronze medal at the Russian agro -industrial exhibition "Golden Autumn - 2021".

As a result, the construction of a water supply system was carried out in the village of Vyvka Kirsanovsky district of the Tambov region, with a length of 5.3 km, and the overhaul of the building of the rural house of culture for 200 places was carried out,

5 projects were implemented in the district as part of the improvement of rural territories:

-crease and arrangement of a combined sports and children's playground in the territory in the village of Leninskoye. ;

-organization of pedestrian communications, including the sidewalk in the village of Zasyanovskaya road st. MSO.;

-buzing and arranging a children's playground in the territory of the Dvionoka.;

Within the framework of the state program in the district, preferential mortgage lending to the population of the district for the purchase and construction of residential buildings and apartments in rural areas at a preferential interest rate -2.7% per annum. Since the beginning of the district's participation in the program, 27 families have improved their housing conditions, including in 2022-5 families.

In 2023, 2 families were already selected in the lists of applicants and the acceptance of applications continues.

Regional project "Acceleration of small and medium -sized enterprises

In order to implement the projects, a list of municipal property was formed for the lease of small and medium-sized enterprises and self-employed to the subjects. The land plots were also included in this list. The list is published on the district website.

Financial support for SMEs, including preferential lending is carried out using the Microcredit organization "Fund for Promoting Creeds of Small and Medium Enterprises of the Tambov Region". The task of the administration is maximally fully informing beginners of entrepreneurs about the capabilities of the company to obtain loans for business development.

Regularly with the participation of the fund, banks and entrepreneurs, a work is being held. Also, all the necessary information is posted on the official administration website.

National Project "Labor Productivity and Employment Support"

State program of the Tambov region "Promoting employment".

Events on the organization of public works have been completed, in the Kirsanovsky district having a socially useful focus.

In 2022, 33 people were attracted to perform this type of work. In 2023, it is planned to use 45 people.

National project

"Digital Economy of the Russian Federation"

Medical, educational organizations, municipal institutions, local governments are connected to the Internet, taking into account the development of wired and wireless technologies. The interaction of citizens and authorities using the feedback platform is ensured, mass socially significant municipal services are transferred to electronic form.

Today, the "digitization" of public administration is actively taking place. Some socially significant services are extraterritorial and without excessive load on the population now. Further direction of work is the implementation of new services in the field of education, healthcare, security, business services.

The district also takes part in the implementation of the measures of the national project "Ecology" in terms of cleaning unauthorized landfills, clearing the coast of water bodies. But he does this without financing within the framework of national projects, and on his own, with the involvement of public organizations.

Events on the National Project "Healthcare" are implemented by the TSBUZ "Kirsanovskaya Central District Hospital" with a branch network in the district.

As part of the regional project "Modernization of the primary health care link", the institution gradually updates medical equipment for examining patients, vehicles were received in the amount of 12 units, 1 mobile medical and preventive complex "Diagnostics".

It is planned in the city of Kirsanov the construction of a hospital, which will also serve the population of the Kirsanovsky district.

The head of the region Egorov Maxim Borisovich in his telegram channel said: "The agreement was signed at the "Wednesday for Life" forum with the general director of Dom.rf Vitaliy Mutko. We intend to build a hospital using the state support mechanism of regions - infrastructure bonds. The project budget is estimated at 7.8 billion rubles, the estimated loan amount is 6.2 billion."

The district in 2023 aims to participate in the new regional project "Tourism and Hospital Industry". An application was submitted for a grant for the development of beaches.

There is an idea to participate in the agriturism project, especially since there are all prerequisites for this in the area.

In order to implement national goals and development priorities, the district takes part in the state program of the Tambov region "Social support of citizens".

Events are being performed:

- the prediction of free travel for students in educational organizations and professional education organizations in accordance with the Law of the Tambov Region dated 05.26.2011 No. 11-Z "On the social support of large families in the Tambov region";

- preference of preferential travel in public transport for certain categories of citizens;

- the prediction of free passage by the categories of persons provided for by the Law of the Tambov Region dated June 1, 2009 No. 533-Z "On additional measures of social support for disabled people and participants in the Great Patriotic War of 1941-1945, former minor prisoners of concentration camps, ghetto and other places of forced content created the Nazis and their allies during the Second World War, and persons awarded the sign of the "resident of the besieged Leningrad";

- Inces of social support to large families, including the provision of free food to students in educational organizations, providing a discount on paying for children in educational organizations, and in organizations implementing the educational program of preschool education.

Every year, a month is held on the territory of each municipality of the district to improve the territory (cleaning the territory of socially significant institutions, roadside lanes, cemeteries includes such events as: clearing snow in the winter, cleaning of weed vegetation, removal of household garbage, whitewashing, and flower beds, arrangement of floral flower beds, Painting and repair of auto -pavilions, as necessary, saw and remove trees that pose a danger to the life of the population, etc.).

The leading place in the service of the population in the district is occupied by passenger road transport. To provide the population with transport services, the district administration concluded a contract for a competitive basis with Crew LLC.

In 2022, the movement was organized in accordance with the approved 14 inter-municipal routes, of which 11 socially significant. In the past year, 12.025 thousand rubles of funds from the regional budget were aimed at compensating for the cost of the carrier in these routes.

The share of the population living in settlements that do not have regular bus or railway communication with the district center is 0.4% in the total population.

In 2023, the region's investment policy will be aimed at continuing the implementation of measures to form an attractive investment climate.

The main areas of work to improve investment attractiveness in 2023 will be:

- an increase in the number of subjects of small and medium -sized enterprises;
- ensuring the growth rate of investment;
- improvement of infrastructure for the development of tourism;
- implementation of new investment projects;
- updating the investment passport, investment sites, registers of municipal property;
- the participation of the area in all kinds of fairs, exhibitions, conferences, forums.

Sincerely,

Head of the Kirsanovsky district A.I.Redin
